

Under the campaign “Power Up with Lean”, SIA Engineering Company has embarked on a Lean journey to equip our workforce with Lean methodologies, building Lean capabilities and promoting a Lean culture within the company.

*Minister of State for Education, Ms Gan Siow Huang viewing the exhibits during the launch of the Lean Academy on 7 September 2021.*

The Lean Academy was set up as an integral element within our Lean ecosystem. Through a team of qualified trainers and divisional facilitators, the Lean Academy will deliver a comprehensive suite of lean courses to the workforce, implement a Lean Accreditation Framework to certify and enable business units to progress in their Lean journey and administer the Lean Certification to recognise individual staff’s progress and achievements in attaining Lean proficiency.

The Lean curriculum includes interactive e-learning modules and instructor-led training, supported by relevant teaching aids and immersive activities, developed to enhance the visualization and learning experience of our workforce. The focus is to enable our employees to journey from the current to the future working state of optimum productivity, quality of work and job satisfaction.
