

Securely and efficiently scale core operational workloads and AI applications across hybrid cloud

Cyber resilience and efficient scaling are absolute musts for world class campuses.

You need an enterprise-grade hybrid cloud infrastructure engineered to handle it all
– **IBM Power 10.**

- Deliver up to 30% more performance per core and over 50% more throughput at the socket and system level
- Save $\frac{1}{3}$ of the energy required to support your critical environments
- Bring AI closer to your data to reduce cost and complexity
