

Transform data into actionable information with Self-Serve Analytics

Available in Performance Plus

Using data visualisations to communicate results effectively across your institution has never been easier. Self-Serve Analytics allows users to dig deeper into data using skills and knowledge they already have around the data points available within Brightspace, but without the complexity of having to work directly with a data warehouse.

Create custom reports

leveraging data from the Brightspace platform and a visualisation engine powered by Domo.

Share reports with viewers across the organisation

so stakeholders can see the impact of the programs.

Expand and elevate your organisation's data usage

by tapping into some excellent power-user features.

Skip the data integration steps

by putting the entire experience in a single location, ready for you to succeed on first use.

Create custom reports

You can create, edit, and share your own reports and visualisations within the Brightspace platform.

Fresh Data Access

You have access to up-to-date datasets ready for visualising.

Schedule and Deliver Visualisations

You can schedule reports and set alerts based on custom logic.

Manage Access to Visualisations

You have the power to leverage row-level permissions and access through group and individual sharing.

We're here to help transform your data into actionable information so you can turn it into knowledge. Help every learner reach their potential with the Self-Serve Analytics product available in Performance Plus for Brightspace.

“Self-Serve Analytics has allowed me to easily look at the use of Quizzes and Assignments across the University, this has been very useful through a challenging examination period. I look forward to exploring the platform in greater detail over the coming months.”
